

Greetings,

I just received the updated Boys State participation numbers from The American Legion. It appears that we just missed our mark of a 10% increase in Boys State participation for 2023. We achieved 9.5% growth in participation over 2022.

As a reminder, Boys State donations and hours were way up on the CSR totals. I do believe our messaging has been successful and we continue to see an increase in participants from the numbers recorded during the pandemic.

The work continues!
